Experience

Salesforce Intern

September 2024 - Now

Vanshiv / India, Jaipur

Intern, Customer Success

July 2024 - August 2024

CloudFiles / India, Bangalore

Intern, Software Engineering Team

September 2021 - May 2023

CloudFiles / India, Bangalore

- I have experience working with the Salesforce team, where I gained valuable insights into LWC (Lightning Web Components) development.
- Developed and implemented a robust quality assurance process to ensure high-quality products

Intern,Associate Quality Assurance Engineer

August 2023 - October 2023

NeoDocto / India, Remote

I worked as an Associate Quality Assurance Engineer. During this time, I was responsible for: analyzing system requirements; developing test plans and cases; executing tests; creating and running automated tests; tracking defects; providing technical support to other teams; monitoring application performance; and resolving issues.

WEB DEVELOPMENT

December 2021 - January 2022

LetsGrowMore / India, Remote

- Created a reusable component library for the web application using React Material, resulting in faster development time for new features

WEB DEVELOPMENT INTERN

August 2021 - November 2021

The Intern Academy / India, Remote

Projects

Boat FriendShip

February 2024 - February 2024

I've successfully developed a Lightning application that empowers sales associates to efficiently input customer boat details, including locations. Furthermore, I have facilitated team members in seamlessly sharing comments and ratings after inspecting each boat. This not only enhances the workflow but also ensures comprehensive information exchange within the team.

Bear Tracking App - LWC

The Bear Tracking App, developed using Lightning Web Components, serves as a tool for park rangers at Ursus Park to monitor and manage bear activities within the national park. Leveraging the latest web standards, this application embraces the new programming model for Lightning components, ensuring seamless integration with both Lightning Web Components and the original Aura programming model. It provides an intuitive interface for rangers to efficiently track and record bear movements, contributing to effective wildlife management within the park.

CRM FOR EDUCATION REVOLUTION APP

Introducing a cutting-edge CRM for seamless Result Tracking. Admins effortlessly create Semesters, Candidates, Courses, and Lecturers. Lecturers empower internal result input and foster collaboration. Deans ensure accuracy and integrity in evaluation. Experience a re-evaluation revolution and automated status updates. Choose our system for a robust, efficient, and transparent education management solution, enhancing collaboration and data accuracy.

QueryQuest

July 2023 - September 2023

QueryQuest is a platform similar to stack Overflow that allows users to post queries, follow other users, add answers and comments, and receive notifications for activities related to their posted queries.

Education-Revolution

October 2023 - January 2024

Embark on an enriched learning journey with Education-Revolution! ▤▤ Students access tailored study materials, engage in Practice and Scheduled Quizzes, and track progress with Daily Quizzes. Admins create a structured material hierarchy, develop quiz systems, and schedule assessments. Key features include collaboration, download options, and automated email reminders for quizzes, user engagement, and scheduled tests.

LEETCODE AUTOMATION

August 2023 - August 2023

The automation starts by systematically searching for specified questions, adding them to the designated list. If the list doesn't exist, the tool creates it, ensuring existing questions remain untouched.
